

TERMS OF SERVICE

AS USED IN THESE DOCUMENTS, THE TERMS “WE,” “OUR” AND/OR “US” REFERS TO THE LEGAL OWNER AND OPERATOR OF THIS NUSPINE LOCATION.

EXPLANATION OF SERVICE

Living life the way you do can cause misalignments in your spine. These misalignments are called “subluxations” and can interfere with how your body’s nervous system operates. The effects of this can be any number of things but often presents with decreased joint function, pain and discomfort, and a lack of proper function in other bodily systems. Chiropractic adjustments are designed to treat conditions that stem from these problems. They are mainly focused on improving the function of the spine, other joints, and the nervous system. Our focus at NuSpine is to provide patients with an affordable, convenient treatment through maintenance and corrective care that can keep them doing all the things they love. The problems they have often affect their lives in more ways than just presenting pain. It affects work, hobbies, sleep, and more. We care deeply about the health and lifestyle of all our patients so it’s our mission to help get, and keep, our patients healthy through routine adjustments.

WHAT WE DO

- We provide affordable, convenient chiropractic adjustments that can help patients reduce pain, improve spine, joint, and nerve function, and lead to a healthier lifestyle.
- We provide hydrotherapy beds for our patients to relax after they’ve received their treatment from the chiropractor. These beds are not used as a specific therapy for the patients’ condition and are free of charge.

WHAT WE DON’T DO

- We do not treat any disease or condition outside the scope of practice; which is limited to the treatment of removing nerve interference through chiropractic adjustments to the spine and extremities.
- We do not accept payment through any third-party payors such as private insurance, Medicare, Medicaid, or any other third parties.
- We do not offer diagnostics beyond the doctor’s personal examinations; such as x-ray. Nor do we offer treatments such as laser, electric stimulation, ultrasound, or others.
- Our services are limited to the rehabilitative or preventative effects of chiropractic care.
- In the event that the doctor requests additional diagnostic testing, such as an x-ray, the patient will be referred to the appropriate provider or facility.

FINANCIAL RESPONSIBILITY

NuSpine’s payment options are presented after the Doctor has determined that chiropractic care, as we provide it, is the appropriate method of treatment and has recommended a treatment plan. NuSpine patients must understand that they are responsible to prepay in full for all services. Furthermore, all patients must understand and agree that we will not be submitting any billing data or related claim(s) on their behalf to any third-party payor, such as private insurance, Medicare, Medicaid, or any other program they possess coverage with.
